Scheme of Work

Date or week number	Learning Content	Differentiated Activities	Assessment and feedback
1	Introduction to the grouped module. Summary of group modules. Summary of both modules content. Comparison and evaluation of learning resources. Summary of the core six business departments brief initial discussion of the departments and what their synergy is. Outline of what customer service is and how this is differentiated between different consumers. Examples of how business and customer service might change in the "new normal".	Students to discuss the six core departments within a business: Core departments: Production Research and Development (often abbreviated to R&D) Purchasing Marketing (including the selling function) Human Resource Management Accounting and Finance. Students will then design an infographic to present their ideas of what the departments do following a brief discussion from the tutor. From this infographic the learners will then design a skills web of how the different departments will contribute to a businesses plan or design. Pecha Kucha: This should be about one particular product which can be anything that you would like to sell. Pecha Kuchas are normally 20x20 but for this task plan 20x10. This task should be done individually. (Required use of IT programs).	Definition task looking at learner knowledge of basic concepts without the use of IT. Skills web shared on teams and reviewed whether this is correct or what level of understanding the learner has of the subject. Students to provide feedback to each other using a feedback form which analyses the suitability of the storyboard for advertising.
2	Understand the value of output Outline and summarise the purpose of GDP how the measure works and whether it is affective or not. Summary of two further business metrics the value of output and value added. Breaking up these measures to best allow the learner to understand the measurement.	Students to take what they have applied and apply it, students to decide on what measures they are going to use. Students to evaluate how they would apply this metric to key businesses. Students need to design their own metric for financial measurement with learners outlining what they are going to use as a basis for value and losses.	Evaluation of GDP, students need to think about the measure and assess whether it is still the right metric not relevant but correct. Researching their own industry and estimate the value of this sector nationally. Learners will compare and rank their measurements based on detail, clarity and measurable value.
3	Why is business important and what is the main goal of business Examine and discuss multiple factors which impact a businesses success and what factors can be manipulated to ensure better success. The group will engage in activities that examine socioeconomic benefits of business and the impacts they have. Points of the mind map will be discussed in a round table discussion. Students introduced and discuss Maslows Hierarchy of needs.	Students to take a look at some of these wider factors and design a pitch a short advert, leaflet or summary of pitch noting how they would be successful in lobbying a large corporation if they were working there. Students to evaluate how some of these factors have affected areas in the UK and how they could be improved or developed further. Students need to look at how roles are affected by the hierarchy of needs with named examples. Learners need to then think what businesses can do to enhance or provide support for the individual. An approach to social reform looking at FIT and UBI in comparison to current tax and benefit systems.	Students to take a practical and social assessment evaluating the sectors impact on welfare and why they are incentivized to make sure the businesses succeed. Learners to look at how these measures have tertiary impacts and what they can do to prevent this opinions will be compared and evaluated.

Scheme of Work

Date or week number	Learning Content	Differentiated Activities	Assessment and feedback
4	Types of ownership How do public (state) companies differ from private owned companies? Students to discuss how borrowing and spending can vary from country to country and what borrowing and spending may impact on a companies tax. At this point the learners will be introduced to socialist and capitalist models. Examine and discuss hyperinflation discussing why a named example has become hyperinflated and potential solutions to rectify it. Further discussion about economic growth and how the concept works in practice.	Students to look at what inflation is and be able to confidently explain this. Learners are also expected to be able to understand how hyperinflation is both caused and prevented. Articulate the advantages and disadvantages of different types of business ownership. In smaller cohorts learners assess the advantages of different types of ownership. Read the description of your assigned client and determine which type of business organization your group would recommend. You need to list four reasons for your recommendation three that are benefits/advantages and one that is a cost/disadvantage. With the cost, students should include a suggestion for how to overcome it or minimize its impact on the sweet maker's business.	Students to answer and discuss topics related to the differences in publicly and state owned businesses. Define and outline different types of ownership, research industry specific examples of this type of ownership. Debrief and reflect on the topic as a whole.
5	Understanding the customers Explanation of how market trends work and occur not what factors alter these trends as well as the pros and cons using covid and other examples for reference. Students to be introduced and review how businesses affect consumer habits.	Students to reflect on what a customer is and what types of consumer they are with a short game where they note what categories they fall within. Students to look at four dietary trends and categoric offshoots and reflect on how they have affected markets to be discussed later in lesson. Examine a product of your choice and think how their marketing strategy was effective on you.	Students to examine several chosen products from the board and explain why they failed or succeeded. Compare the concept of the business they have just investigated to seasonal or short term stock items if the was limited would it add or detract value.
6	Franchising and land use Explain to the countries what Franchise models are both in what they are and where there pitfalls lie as well as the opportunities. Show learners the examples of what the pros and cons of the model are and discuss any further advantages or disadvantages for the business. Outlining what a franchise does not do. Discuss and describe the different types of land uses. Discuss and describe the different types of ownership and how the different circumstances can affect your business or you personally.	Design a franchise for a pet services business of your choice outlining the benefit of franchising your brand and not expansion. Explain why the model works as a franchise opportunity, by carrying out a SWOT of the concept. Evaluate the case of how McDonalds shows us the improvement of ownership and effective use of resources. Students should examine the case study of McDonald and how ownership transferred.	Define the difference between GDP and GNP noting why both methods could be improved by GDH which is more suitably applied to the likes of countries like Iceland. Students to describe how a business, commercial or residential tenant may vary and how these impact the costs. Students should be able to articulate why McDonalds owners made mistakes.

Scheme of Work

Date or week number	Learning Content	Differentiated Activities	Assessment and feedback
7	Marketing Trends Students have consumer cycles explained to them and how this correlates with product cycles looking at the reason for this trend. To further understand marketing trends learners need to be able to recognize tools of the trade such as social media the learners need to recognize the pros and cons of this and conventional email ads. Explanation of how we deliver content and why youtube is becoming a dominant presence in how we consumer information.	Students need to be aware of how they are going to assess marketing trends and how they would be able to evaluate these trends if they are working towards a project evaluation or launch. Students need to be able to recognize how to personalize marketing. Students are to reflect on their own personal branding looking at their social media critically by evaluating a peers social media what does it say about them as a person. What is their audience, purpose and image? What would a business using this data or a consumer of their content gain from this? Research the following methods and summarise in groups how you would you use them to advertise or market a pets at home product?	Describe what a market trend is and how to identify one in their industry or something that they have seen in society. This session is linked to lesson 5. Students to compare different social media companies dominance on the data market and to what affect or benefit this has for businesses. The student also needs to be able to evaluate the problems with a business trend like this. Students to summarise why to use at least five forms of social media marketing for their own uses.
	Half Term		
8	Customer Service Practical interview skills investigating the four core disciplines of practical customer service. Effective communication (eg addressing customers face to face, appropriate telephone manner, effective written communication, use of social media) Courtesy and helpfulness Appropriate dress and body language Product knowledge	Students will carry out a practical sessions where they outline and demonstrate practical skills. Students will design a booklet comparing good customer service to someone with bad customer service skills. Students from the animal route will be addressing category management and how the system should be effectively managed describing the different customers.	Zoo route Task 1 launch. The zoo route will be assessed practically for task 1 b whilst they will be introduced to the reports content which is due in three weeks. Animal route will be assessed and given a grade as if they were carrying out task 1 b but will not be assessed for task 1 a.
9			
10	How Legislation effects Business Design a leaflet to summarise and describe the acts to a new fledging business evaluating how to follow the procedures and the importance of compliance. Evaluate how businesses have suffered litigation and how could it have been avoided.	Evaluation of these five principle laws evaluating when an individual, business or owner is responsible for a particular action. Evaluate particular financial measures used in product design and sales of goods. Create a leaflet to summarise and describe the acts to a new fledging business evaluating how to follow the procedures and the importance of compliance.	Review the module so far and reflect on areas you are struggling in, what areas you have found easy. Compare your leaflets on clarity with a peer as well as comparing it to the summary of the five businesses.
11			

Scheme of Work

Date or week number	Learning Content	Differentiated Activities	Assessment and feedback
12	Understand how businesses work together Understand the variation in three types of sectors and what relationship they have with other businesses. Compare and evaluate what an associated organisation is and what affect a governing body might have on a business or sector. Research and evaluate the effectiveness of three regulatory bodies and their effect on the market.	Design an example of how four different sectors interact and behave with one another. Design a flow chart for how the different industries interact with one another. Discuss how these industries interacted with one another and what factors a government can use to stimulate the growth of a sector.	Zoo route Task 1 submission, Task 2 Launch Present an animal related issue which has a business-related factor. Identify how you are going to solve the issue. What are the problems, what are the solutions. Which industries are associated with the issue what are the advantage and what are the negative implications of there involvement. Evaluate the effectiveness of three regulators to accomplish this you should be able to but not limited to State the primary goal of the organisation. Justify the reason for the organisations founding. Evaluate whether you believe the organisation is effective and why it is or isn't effective. Conclude how the organisation impacts industry professionals.
13	Customer Flow Understand flow and logistics what is the difference between a store layout and a supply chain? Understand the difference designs and methods of display used in the retail sector. Design a store layout which you feel is the most appropriate form to present a store to the general public. Understand what a supply chain is and how they are set up compare how different products are affected following an issue with the logistics program.	Design a store layout for one of the following: This should include a store with products, animals and other services. Grid Loop Straight Shaped: diagonal, angular, geometric Free flow Boutique	What are the supply chains involved in each and what were the leading influences for the brands success. Examine a company (Coca-Colas) supply looking at how a New Product Develops and changes. The learners need to be able to address the development of how the different departments have interacted with the business. Students need to be able to justify and understand how this works via essay writing and peer marking.
14	Resources Comprehend the uses of physical resources for several case study businesses. Examine how businesses safeguard their physical assets when protecting the company. Understand how insurance works compare both commercial insurance, to personal insurance. What is the difference between intellectual property and physical property.	To accurately safeguard a business you need to understand what the provision is and then how you safeguard the feature. On the board we are going to produce two halves of a diagram one is physical and other is service based. We are going to assess their physical resources and how to protect or safeguard the risk to the company. Now we must look at the strategic resource: These are often something which is functionally beneficial to the business or essential to its survival. For the following physical resources I need you to look at how these businesses have safeguarded their resources? Understand what happens to certain types of property, how you can protect it what your rights are what you can and cannot own and how this varies internationally.	Q&A session looking at physical resource management. justify whether you agree or disagree with companies use of their resources. Debate on property discussing the four core points group assessment and presentation of ideas. Task 2 Submission
Christmas Break			

Scheme of Work

Date or week number	Learning Content	Differentiated Activities	Assessment and feedback
15	Teamwork and Teambuilding Complete a variety of team building activities to improve on communication skills and reflect on the importance of team building. Evaluate a variety of team building activities and conclude what is the most useful form of team building and what its limitations are.	Each of you take a post it note and write on an example of an animal or business specific term. This can be a product, an animal, that is on your syllabus. The point of this game is to learn how to effectively problem-solve with a team. The only materials your reps will have during this activity to help them find a solution is their voices. This will encourage them to listen to each other, collaborate, use trial and error, and work as efficiently as possible to find a quick solution, which are necessary steps when trying to do the same for a customer.	Break off into two groups: Each of you will be given a tennis ball your goal is to get all of you to have touched the tennis ball with both hands in the fastest possible time. Evaluate the activities and conclude both why it is practical for a business and useful for communication. Task 3 launch
16	Logistics Define what a supply chain is Address the interconnected aspects of logistics and supply. Understand how ethics are applied to supply chain.	How do certain methods or types of supply chains affect your consumer base. Think of notable supply chains Nestle and own a villages water supply, palm oil in pepsi co products, McDonalds and their beef primarily sourced from Brazil. Think about PR how does it make you feel as the consumer are there any positive cases. Compare an ethical land-based company with those that have a negative supply chain. What would advise the company to do.	Supply chain assurance is measured by answering the following: what is McDonalds risk What does their supply chain look like? What is their supply chain risk? Who has access to their critical business systems and data?

Scheme of Work

Date or week number	Learning Content	Differentiated Activities	Assessment and feedback
17	Quality management systems Identify a quality management system in the land-based field. Understand how quality review is applied in business Review the effects of quality review or improper review of systems on a business.	Using Pets at Home as an example what area's which could be improved on to facilitate QMS results. What are the systems that cost the business money and where would you improve it. What new processes could be created. How would you get staff involved.	Design and Build The design and build portions serve to develop the structure of a QMS, its processes, and plans for implementation. Management should oversee this portion to ensure the needs of the organization and the needs of its customers are a driving force behind the systems development. Deploy Deployment is best served in a small chunks by breaking each process down into subprocesses and educating staff. Company intranets are increasingly being used to assist in the deployment of quality management systems. Control and Measure Control and measurement are two areas of establishing a QMS that are largely accomplished through routine, systematic audits of the quality management system. The specifics vary greatly from organization to organization depending on size, potential risk, and environmental impact. Review and improve The goals are to determine the effectiveness and efficiency of each process toward its objectives, to communicate these findings to the employees, and to develop new best practices and processes based on the data collected during the audit Task 3 Submission Task 4 launch
18	Record keeping Address the importance of record keeping identifying five reasons for record keeping. Compare different types of record keeping. Address how to apply kpi targets.	An example will be provided for a farm and veterinary record. Following this you need to think why they might be used in both cases. Introduction to private record keeping the cost of university, students to identify the cost of their uni choices as well as how to best afford it.	Complete a table looking at different types of record both why we have it and how they are applied. Justify why it is important to have effective record keeping.
19	Case Study	In the pet food sector you have different categories.	List and discuss the sectors within the land-based sectors.

Scheme of Work

Date or week number	Learning Content	Differentiated Activities	Assessment and feedback
20	Investigate different businesses identifying the size of the market they are in and how this impacts their business. Understand and address the impact which influencers have on the sector and changes that are occurring because of their involvement. What are the categories of consumers and how they should be categorized addressing both why they fall into this category the benefits of this form of management and how effective it is? Comparison of a competitor to their case study business using different resources to compare and contrast the validity of their approach to business.	Types of animal is one that has been evidenced but what are the other factors and what are their influences. You need to conduct a comparison of a land based business if you were doing this for the food market	Compare these case studies against each other using comparable measures to assess and quantify the businesses success. Task 4 launch
	Half term		
21	Marketing reports Students should be able to provide a comparable marketing report which outlines the core marketing goals of a zoo or business. The report should be able to outline the various points of the report. The rationale behind its formation, does the document cover all forms of management, how to analyse the businesses scope and SWOT.	Students to carry out a report looking at the businesses performance in marketing a new section, or product. The student should be able to assess the existing measures by the zoo using a swot analysis. This should be supported by a scope analysis of the project they are undertaking.	Students are assessed on the scope and swot analysis they provide. They are also assessed on how they then suggest and justify the report for the new section which they will compare with their peers voting on what is the best suggestion for the zoo in a dragon den style pitch. Task 4 Submission
22	<i>Synoptic period and revision</i>		
23			
24			
25			
	Easter Break		

Scheme of Work

Date or week number	Learning Content	Differentiated Activities	Assessment and feedback
26	Adverts and marketing Following on week 21 the learners are to reassess the different forms of advertising and marketing noting the benefits of each type of advert.	Students to find a memorable advert and introduce it as if they were the individual pitching it to the company. Compare the example of a good advert vs a negative advert and explain why the advert is not a good form of advert for the company. This must be in the same sector but can be a different company. Design a plan for an advert what should it include and what should be avoided.	Comparing the strengths and weaknesses of the different types of advertisement and marketing strategy. Review different forms of adverts and justify why it was a good strategy. Look at forms of advertising which have been mismatched either politically or culturally stating why this is the case. Students also need to ensure that they are able to conclude what makes a good effort.
27	Employment Law Understand the application of the four key legal acts regarding employment. Comprehend how the laws are applied in business Note the differences between the business world and animal care.	Summarise the equality act what does it protect you against? Why is it important that we are protected under the equality act? What types of discrimination can the equality act protect you against? How do we apply these four acts to the animal care sector. You need to be able to think how these laws are applied to the wider field.	Summarise what the following acts do in your view what are their purposes? Employment Act 2002 National minimum wage Act 1998 Working times regulation Act 1998 Equality Act 2010 How we combat racism and unconscious bias in the workplace critical discussion
28	Stock Management Design a method for stock rotation and evaluate the effectiveness of different business stock rotation methods. Inventory the cost a business and the impact on your business models conclude how to mitigate manufacturing costs and how to understand how businesses succeed or fail because of it. Differences in regulations, be able to accurately discern the differences between various items of inventory such as medicines.	When dealing with livestock what processes do you have to follow in terms of stock rotation Students to conduct research looking at the farm, research and zoo sectors to what form of management practices they use in their industry.	What is stock management and what are the main purposes of using it in the pet care industry? Plan a stock management system for an animal care environment bringing in knowledge about products as well as a livestock.
29	Personal and Company Branding how the Differ.	Students need to be able to work towards producing and generating content for a website which will serve both their personal and professional portfolio. Students will then be able to address how their personal branding and experiences vary from one job to another.	Students to peer review and assess their websites, students to share their blog posting with other members. Noting the type of content the website intends to cover without giving away their personal details. Students then to be graded on detail clarity
30	Student to reflect on personal branding and the content that they can put out to an industry standard noting how personal brand and company branding are different. Introduction to both topics in session 1 followed by a development of a particularly relevant piece of content for a mock website, such as a photo showcasing a blog article.		
31	Module Recap		
32	Revision and recap of taught content covered across the two modules. Psychometric mock exam included and then reflected on by the individual to assess their understanding of various levels of topic content both level 3 topics taught and further level 5 and 6 works.		
	Half term		

Scheme of Work

Date or week number	Learning Content	Differentiated Activities	Assessment and feedback
33	Career development Students to redesign their career portfolio to maximise their employment chances after leaving the college. The student should be able to understand what is included in a CV as well as redesigning their CV and Cover Letter to be suitable across different platforms and databases.	Students to redesign a CV and Cover letter which addresses the need of a changing workplace and take this information to include on an about me and LinkedIn page. Learners to actively design and construct new career portfolio content which allows them to stand out. Group to discuss the benefits of embedded social media with a constructive approach to their careers.	Students to be graded not on their qualifications or experiences but how they have been best able to market themselves. Which CV's and Cover letters stand out who has the best designs, most innovative approaches and how would they improve.
